

The Tri Tones Jazz Trio technical specifications

Updated April 2018

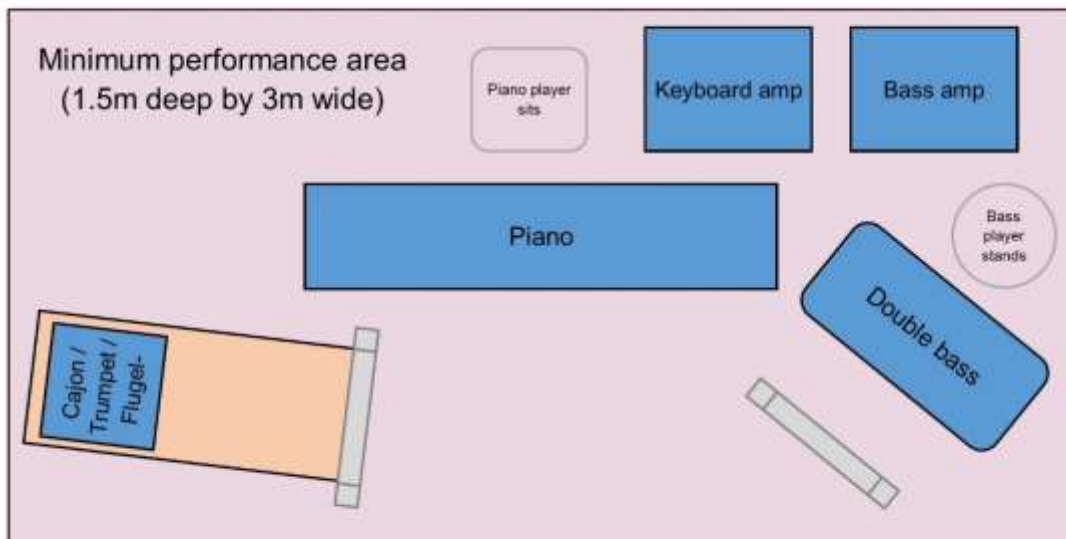

The Tri Tones are made up of:

- Piano (usually a digital piano that we bring with us)
- Double bass / upright bass
- Trumpet/flugelhorn + cajon/percussion

The piano and the double bass both use small amps to bump up their sound volumes a little, but we still very much consider ourselves an acoustic act.

We need an area at least around 1.5m deep by 3m wide to set up and perform in.

Tri Tones stage layout (updated April 2018)

We ask the following:

- Please provide one chair (without arms, preferably) for the piano player.
- Please provide at least 1 plug socket near our performance area, but we will eventually be plugging in three sockets. (We will bring an extension/adaptor, though.)
- If we are performing outside, please provide suitable cover/shade.
