

# Tri Tones Jazz technical specifications

Updated Sep 2023

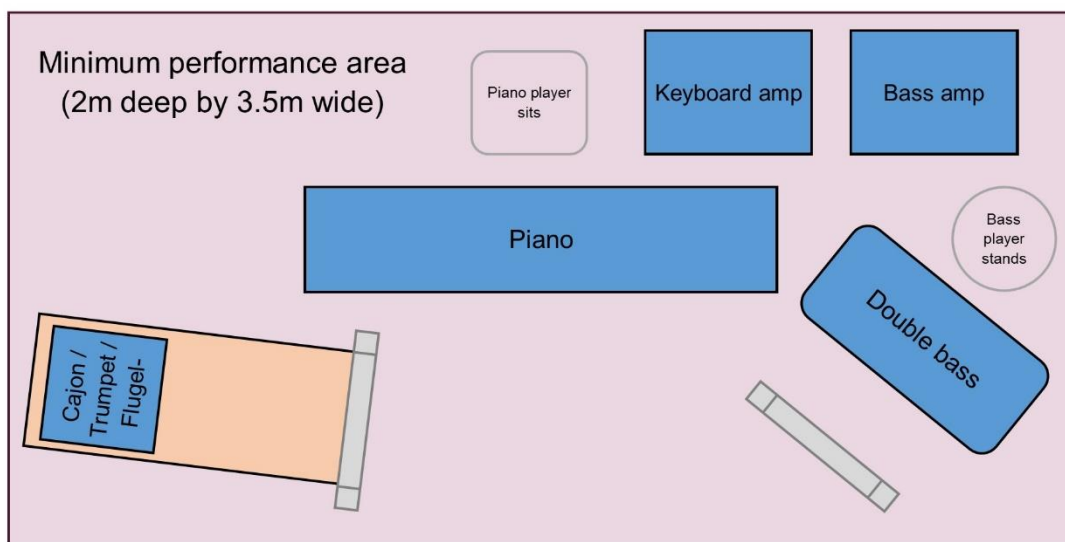

Our usual line up is:

- Piano (usually a digital piano that we bring with us)
- Double bass / upright bass
- Lead line player (usually trumpet/flugelhorn/saxophone + cajon/percussion)

The piano and the double bass both use small amps to bump up their sound volumes a little, but we still very much consider ourselves an acoustic act.

We need an area at least around 2m deep by 3.5m wide to set up and perform in.

**Tri Tones stage layout (updated Sep 2023)**

We ask the following:

- Please provide at least 1 plug socket near our performance area, but we will eventually be plugging in three sockets. (We will bring an extension/adapter, though.)
- If we are performing outside, please provide suitable cover/shade. Note: this includes cover from rain in bad weather, but also cover from direct sunlight in good weather.
